Subject Index

- Abiotic degradation, environmental exposure, hazard assessment, testing, 145
- Acifluorfen, pesticides, trifluralin, soil biomass, 261
- Acifluorfen, humic acids, adsorption isotherms, 93
- Activated charcoals, herbicides, adsorption, 101
- Activated sludge, pesticides, soil persistence, biodegradation, 279
- Adsorption, humic substances, iron-humates, glyphosate, soil, herbicides, 77
- Adsorption, activated charcoals, herbicides, 101
- Adsorption, pesticide, heavy metal, montmorillonite, 133
- Adsorption, pesticide, soils, chlorpyrifos, 541
- Adsorption, soil, desorption, pesticides, availability, time, 333
- Adsorption, soil, diuron, fertilizer salts, 551
- Adsorption isotherms, acifluorfen, humic acids, 93
- Aldicarb, carbofuran, seed treatment, reduction of dose, 571
- Amitraz, chemiluminescence, singlet oxygen, oxygen radicals, 195
- Analysis, biosensor, pesticides, 1
- Analysis, pesticides, gas-liquid chromatography, fruits, 29
- Analysis of water, gas chromatography, mass spectrometry, organophosphorus analysis, environment, 45
- Anomalous diffusion, random walk, leaching, pesticide sorption, porous media, 451
- Aqueous solubility, sorption, soil, chloroaniline, octanol/water partition coefficient (K_{oc}), 519
- Aqueous solutions, metoxuron, carbetamide, oxygen species, elimination, 183
- Atrazine, chloroorganic insecticides, pesticide residues, DDT, lindan, pesticide transport from soil, 491
- Atrazine, glyphosate, *Vicia faba*, soil, micronuclei, 233
- Atrazine, photocatalysis, titanium dioxide, herbicide photodegradation, 161
- Atrazine, soil, volatility, chamber, direct measurement, 391
- Atrazine, trifluralin, soil sorption coefficient (K_d), soil sorption constant (K_{oc}), 503
- Availability, soil, adsorption, desorption, pesticides, time, 333
- Azotobacter*, poly-B-hydroxybutyrate (PHB), encystment phase, captan, 361
- Bentazone, reversed-phase HPLC, soil, kaolinite, montmorillonite, peat, photodiode array detection, 57
- Binding mechanisms, soil, humic substances, pesticides, humic acids, fulvic acids, 63
- Biodegradation, molinate, decontamination, processes, water, 219
- Biodegradation, pentachloronitrobenzene, micromycetes, phenoloxidas, 299
- Biodegradation, pentachlorophenol, pentachloronitrobenzene, micromycetes, phenoloxidas, 291
- Biodegradation, pesticides, soil persistence, activated sludge, 279
- Biomass radioactive labelling, pesticide side effects, microbial biomass, 325
- Biomineralization, terbutylazine, soil-plant system, maize, volatilization, lysimeters, 377
- Biosensor, pesticides, analysis, 1
- Bound residues, pesticides, humic substances, chlorophenols, covalent binding, 205
- Butylate, mobility, Leaching Estimation and Chemistry Model (LEACHM), simulation model, 531

- Captan, *Azotobacter*, poly-B-hydroxybutyrate (PHB), encystment phase, 361
- Carabofuran, controlled release, lignin, soil properties, 469
- Carbetamide, metoxuron, oxygen species, aqueous solutions, elimination, 183
- Carbofuran, aldicarb, seed treatment, reduction of dose, 571
- Carbofuran, monocrotophos, heat output, carbon and nitrogen mineralization, soil, Northern Thailand, 241
- Carbon and nitrogen mineralization, carbofuran, monocrotophos, heat output, soil, Northern Thailand, 241
- Chamber, atrazine, soil, volatility, direct measurement, 391
- Chemical movement, chlorsulfuron, leaching, simulation, modelling, 561
- Chemiluminescence, amitraz, singlet oxygen, oxygen radicals, 195
- Chemodynamic parameters, leaching potential, groundwater contamination, pesticides, 581
- Chloroaniline, sorption, soil, aqueous solubility, octanol/water partition coefficient (K_{oc}), 519
- Chloroorganic insecticides, pesticide residues, DDT, lindan, atrazine, pesticide transport from soil, 491
- Chlorophenols, pesticides, humic substances, bound residues, covalent binding, 205
- Chlorpyrifos, pesticide, soils, adsorption, 541
- Chlorsulfuron, leaching, simulation, modelling, chemical movement, 561
- Controlled release, carabofuran, lignin, soil properties, 469
- Corn cultivation, fly ash, soil, persistence, 2,4-dichlorophenoxy acetic acid, 481
- Covalent binding, pesticides, humic substances, bound residues, chlorophenols, 205
- Crystallinity, quinmerac, synthetic iron oxides, natural iron oxides, soils, organic carbon content, 121
- 2,4 D-degradation, radiorespirometry, residues analysis, 345
- Dalapon, 2,2-dichloropropionate, *Pseudomonas alcaligenes*, monochloroacetic acid, dichloroacetic acid, 2-monochloropropionic acid, 2,2-dichloropropionic acid, 267
- pionic acid, 2,2-dichloropropionic acid, 267
- DDT, chloroorganic insecticides, pesticide residues, lindan, atrazine, pesticide transport from soil, 491
- Decontamination, molinate, processes, water, biodegradation, 219
- Degradation, herbicide, molinate, microorganisms, metabolism, 309
- Desorption, soil, adsorption, pesticides, availability, time, 333
- Dichloroacetic acid, 2,2-dichloropropionate, *Pseudomonas alcaligenes*, dalapon, monochloroacetic acid, 2-monochloropropionic acid, 2,2-dichloropropionic acid, 267
- Dichloroprop, mobility, soil-water system, octanol/water partitioning coefficient, 399
- 1,3-Dichloropropene, mathematical description, transformation in soil, temperature, microbiological interspective competition, population size and growth, 591
- 2,2-Dichloropropionate, *Pseudomonas alcaligenes*, dalapon, monochloroacetic acid, dichloroacetic acid, 2-monochloropropionic acid, 2,2-dichloropropionic acid, 267
- 2,2-Dichloropropionic acid, 2,2-dichloropropionate, *Pseudomonas alcaligenes*, dalapon, monochloroacetic acid, dichloroacetic acid, 2-monochloropropionic acid, 267
- 2,4-Dichlorophenoxy acetic acid, fly ash, soil, corn cultivation, persistence, 481
- Dichloroprop, mobility, macropores, intact soil columns, lysimeter experiment, 411
- Direct measurement, atrazine, soil, volatility, chamber, 391
- Diuron, herbicides, paraquat, *Rhizobium*, nitrogen fixation, 249
- Diuron, soil, adsorption, fertilizer salts, 551
- Elimination, metoxuron, carbetamide, oxygen species, aqueous solutions, 183
- ELISA, isoproturon, monoclonal antibodies, soil, 17
- Encystment phase, *Azotobacter*, poly-B-hydroxybutyrate (PHB), captan, 361
- Environment, gas chromatography, mass spectrometry, organophosphorus analysis, analysis of water, 45

- Environmental exposure, hazard assessment, testing, abiotic degradation, 145
- Fertilizer salts, soil, adsorption, diuron, 551
- Field testing, soil and groundwater contamination potential, tiered testing scheme, lysimeter, model calculation, 421
- Fluorescence spectroscopy, infrared spectroscopy, humic acid, glyphosate, soil, 83
- Fly ash, soil, corn cultivation, persistence, 2,4-dichlorophenoxy acetic acid, 481
- Fruits, pesticides, analysis, gas-liquid chromatography, 29
- Fulvic acids, soil, humic substances, pesticides, binding mechanisms, humic acids, 63
- Fungicide, triazole, soil thin layer chromatography (TLC), mobility in soil, successive leaching, 459
- Gas chromatography, mass spectrometry, organophosphorus analysis, environment, analysis of water, 45
- Gas-liquid chromatography, pesticides, analysis, fruits, 29
- Glyphosate, atrazine, *Vicia faba*, soil, micronuclei, 233
- Glyphosate, humic substances, iron-humates, soil, herbicides, adsorption, 77
- Glyphosate, infrared spectroscopy, fluorescence spectroscopy, humic acid, soil, 83
- Groundwater contamination, leaching potential, pesticides, chemodynamic parameters, 581
- Hazard assessment, environmental exposure, testing, abiotic degradation, 145
- Heat output, carbofuran, monocrotophos, carbon and nitrogen mineralization, soil, Northern Thailand, 241
- Heavy metal, adsorption, pesticide, montmorillonite, 133
- Herbicide, maleic hydrazide, montmorillonites, interaction, 109
- Herbicide, molinate, degradation, microorganisms, metabolism, 309
- Herbicide photodegradation, photocatalysis, titanium dioxide, atrazine, 161
- Herbicides, activated charcoals, adsorption, 101
- Herbicides, diuron, paraquat, *Rhizobium*, nitrogen fixation, 249
- Herbicides, humic substances, iron-humates, glyphosate, soil, adsorption, 77
- HPLC, residues, imazapur, soil, water, pesticides, 39
- Humic acid, infrared spectroscopy, fluorescence spectroscopy, glyphosate, soil, 83
- Humic acids, actifluorfen, adsorption isotherms, 93
- Humic acids, soil, humic substances, pesticides, binding mechanisms, fulvic acids, 63
- Humic substances, iron-humates, glyphosate, soil, herbicides, adsorption, 77
- Humic substances, pesticides, bound residues, chlorophenols, covalent binding, 205
- Humic substances, soil, pesticides, binding mechanisms, humic acids, fulvic acids, 63
- Imazapur, residues, HPLC, soil, water, pesticides, 39
- Infrared spectroscopy, fluorescence spectroscopy, humic acid, glyphosate, soil, 83
- Intact soil columns, dichlorprop, mobility, macropores, lysimeter experiment, 411
- Interaction, maleic hydrazide, herbicide, montmorillonites, 109
- Iron-humates, humic substances, glyphosate, soil, herbicides, adsorption, 77
- Isoproturon, ELISA, monoclonal antibodies, soil, 17
- Isoxaben, photoproducts, photolysis, 171
- Kaolinite, reversed-phase HPLC, bentazone, soil, montmorillonite, peat, photodiode array detection, 57
- Kinetics, pesticides, modelling, parameters estimation, 435
- Leaching, chlorsulfuron, simulation, modelling, chemical movement, 561
- Leaching, pesticides, residues, propoxur, 513
- Leaching, random walk, anomalous diffusion, pesticide sorption, porous media, 451
- Leaching Estimation and Chemistry Model (LEACHM), mobility, butylate, simulation model, 531

- Leaching potential, groundwater contamination, pesticides, chemodynamic parameters, 581
- Lignin, controlled release, carabofuran, soil properties, 469
- Lindan, chloroorganic insecticides, pesticide residues, DDT, atrazine, pesticide transport from soil, 491
- Lysimeter, soil and groundwater contamination potential, tiered testing scheme, model calculation, field testing, 421
- Lysimeter experiment, dichlorprop, mobility, macropores, intact soil columns, 411
- Lysimeters, terbutylazine, soil-plant system, maize, volatilization, biomineralization, 377
- Macropores, dichlorprop, mobility, intact soil columns, lysimeter experiment, 411
- Maize, terbutylazine, soil-plant system, volatilization, biomineralization, lysimeters, 377
- Maleic hydrazide, herbicide, montmorillonites, interaction, 109
- Mass spectrometry, gas chromatography, organophosphorus analysis, environment, analysis of water, 45
- Mathematical description, transformation in soil, 1,3-dichloropropene, temperature, microbiological interspective competition, population size and growth, 591
- Metabolism, herbicide, molinate, degradation, microorganisms, 309
- Metoxuron, carbetamide, oxygen species, aqueous solutions, elimination, 183
- Microbial biomass, pesticide side effects, biomass radioactive labelling, 325
- Microbiological interspective competition, mathematical description, transformation in soil, 1,3-dichloropropene, temperature, population size and growth, 591
- Micromycetes, pentachloronitrobenzene, biodegradation, phenoloxidases, 299
- Micromycetes, pentachlorophenol, pentachloronitrobenzene, biodegradation, phenoloxidases, 291
- Micronuclei, atrazine, glyphosate, *Vicia faba*, soil, 233
- Microorganisms, herbicide, molinate, degradation, metabolism, 309
- Mobility, butylate, Leaching Estimation and Chemistry Model (LEACHM), simulation model, 531
- Mobility, dichlorprop, soil-water system, octanol/water partitioning coefficient, 399
- Mobility, dichlorprop, macropores, intact soil columns, lysimeter experiment, 411
- Mobility in soil, fungicide, triazole, soil thin layer chromatography (TLC), successive leaching, 459
- Model calculation, soil and groundwater contamination potential, tiered testing scheme, lysimeter, field testing, 421
- Modelling, chlorsulfuron, leaching, simulation, chemical movement, 561
- Modelling, pesticides, kinetics, parameters estimation, 435
- Molinate, decontamination, processes, water, biodegradation, 219
- Molinate, herbicide, degradation, microorganisms, metabolism, 309
- Monochloroacetic acid, 2,2-dichloropropionate, *Pseudomonas alcaligenes*, dalapon, dichloroacetic acid, 2-monochloropropionic acid, 2,2-dichloropropionic acid, 267
- 2-Monochloropropionic acid, 2,2-dichloropropionate, *Pseudomonas alcaligenes*, dalapon, monochloroacetic acid, dichloroacetic acid, 2,2-dichloropropionic acid, 267
- Monoclonal antibodies, ELISA, isoproturon, soil, 17
- Monocrotophos, carbofuran, heat output, carbon and nitrogen mineralization, soil, Northern Thailand, 241
- Montmorillonite, adsorption, pesticide, heavy metal, 133
- Montmorillonite, reversed-phase HPLC, bentazone, soil, kaolinite, peat, photodiode array detection, 57
- Montmorillonites, maleic hydrazide, herbicide, interaction, 109
- Natural iron oxides, quinmerac, synthetic iron oxides, soils, organic carbon content, crystallinity, 121
- Nitrogen fixation, herbicides, diuron, paraquat, *Rhizobium*, 249
- Northern Thailand, carbofuran, monocro-

- tophos, heat output, carbon and nitrogen mineralization, soil, 241
- Octanol/water partition coefficient (K_{oc}), sorption, soil, chloroaniline, aqueous solubility, 519
- Octanol/water partitioning coefficient, dichloroprop, mobility, soil-water system, 399
- Organic carbon content, quinmerac, synthetic iron oxides, natural iron oxides, soils, crystallinity, 121
- Organophosphorus analysis, gas chromatography, mass spectrometry, environment, analysis of water, 45
- Oxygen radicals, amitraz, chemiluminescence, singlet oxygen, 195
- Oxygen species, metoxuron, carbetamide, aqueous solutions, elimination, 183
- Parameters estimation, pesticides, modelling, kinetics, 435
- Paraquat, herbicides, diuron, *Rhizobium*, nitrogen fixation, 249
- Peat, reversed-phase HPLC, bentazone, soil, kaolinite, montmorillonite, photodiode array detection, 57
- Pentachloronitrobenzene, micromycetes, biodegradation, phenoloxidas, 299
- Pentachloronitrobenzene, pentachlorophenol, micromycetes, biodegradation, phenoloxidas, 291
- Pentachlorophenol, pentachloronitrobenzene, micromycetes, biodegradation, phenoloxidas, 291
- Persistence, fly ash, soil, corn cultivation, 2,4-dichlorophenoxy acetic acid, 481
- Pesticide, adsorption, heavy metal, montmorillonite, 133
- Pesticide, soils, adsorption, chlorpyrifos, 541
- Pesticide residues, chloroorganic insecticides, DDT, lindan, atrazine, pesticide transport from soil, 491
- Pesticide side effects, microbial biomass, biomass radioactive labelling, 325
- Pesticide sorption, random walk, anomalous diffusion, leaching, porous media, 451
- Pesticide transport from soil, chloroorganic insecticides, pesticide residues, DDT, lindan, atrazine, 491
- Pesticides, acifluorfen, trifluralin, soil biomass, 261
- Pesticides, analysis, gas-liquid chromatography, fruits, 29
- Pesticides, biosensor, analysis, 1
- Pesticides, humic substances, bound residues, chlorophenols, covalent binding, 205
- Pesticides, leaching potential, groundwater contamination, chemodynamic parameters, 581
- Pesticides, modelling, kinetics, parameters estimation, 435
- Pesticides, residues, imazapur, HPLC, soil, water, 39
- Pesticides, residues, leaching, propoxur, 513
- Pesticides, soil, adsorption, desorption, availability, time, 333
- Pesticides, soil, humic substances, binding mechanisms, humic acids, fulvic acids, 63
- Pesticides, soil persistence, biodegradation, activated sludge, 279
- Phenoloxidas, pentachloronitrobenzene, micromycetes, biodegradation, 299
- Phenoloxidas, pentachlorophenol, pentachloronitrobenzene, micromycetes, biodegradation, 291
- Photocatalysis, titanium dioxide, atrazine, herbicide photodegradation, 161
- Photodiode array detection, reversed-phase HPLC, bentazone, soil, kaolinite, montmorillonite, peat, 57
- Photolysis, isoxaben, photoproducts, 171
- Photoproducts, isoxaben, photolysis, 171
- Poly-B-hydroxybutyrate (PHB), *Azotobacter*, encystment phase, captan, 361
- Population size and growth, mathematical description, transformation in soil, 1,3-dichloropropene, temperature, microbiological interspersive competition, 591
- Porous media, random walk, anomalous diffusion, leaching, pesticide sorption, 451
- Processes, molinate, decontamination, water, biodegradation, 219
- Propoxur, pesticides, residues, leaching, 513
- Pseudomonas alcaligenes*, 2,2-dichloropropionate, dalapon, monochloroacetic acid, dichloroacetic acid, 2-monochloropropionic acid, 2,2-dichloropropionic acid, 267

- Quinmerac, synthetic iron oxides, natural iron oxides, soils, organic carbon content, crystallinity, 121
- Radiorespirometry, residues analysis, 2,4 D-degradation, 345
- Random walk, anomalous diffusion, leaching, pesticide sorption, porous media, 451
- Reduction of dose, aldicarb, carbofuran, seed treatment, 571
- Residues, imazapur, HPLC, soil, water, pesticides, 39
- Residues, pesticides, leaching, propoxur, 513
- Residues analysis, radiorespirometry, 2,4 D-degradation, 345
- Reversed-phase HPLC, bentazone, soil, kaolinite, montmorillonite, peat, photo-diode array detection, 57
- Rhizobium*, herbicides, diuron, paraquat, nitrogen fixation, 249
- Seed treatment, aldicarb, carbofuran, reduction of dose, 571
- Simulation, chlorsulfuron, leaching, modelling, chemical movement, 561
- Simulation model, mobility, butylate, Leaching Estimation and Chemistry Model (LEACHM), 531
- Singlet oxygen, amitraz, chemiluminescence, oxygen radicals, 195
- Soil, adsorption, desorption, pesticides, availability, time, 333
- Soil, adsorption, diuron, fertilizer salts, 551
- Soil, atrazine, glyphosate, *Vicia faba*, micronuclei, 233
- Soil, atrazine, volatility, chamber, direct measurement, 391
- Soil, carbofuran, monocrotophos, heat output, carbon and nitrogen mineralization, Northern Thailand, 241
- Soil, ELISA, isoproturon, monoclonal antibodies, 17
- Soil, fly ash, corn cultivation, persistence, 2,4-dichlorophenoxy acetic acid, 481
- Soil, humic substances, iron-humates, glyphosate, herbicides, adsorption, 77
- Soil, humic substances, pesticides, binding mechanisms, humic acids, fulvic acids, 63
- Soil, infrared spectroscopy, fluorescence spectroscopy, humic acid, glyphosate, 83
- Soil, residues, imazapur, HPLC, water, pesticides, 39
- Soil, reversed-phase HPLC, bentazone, kaolinite, montmorillonite, peat, photo-diode array detection, 57
- Soil, sorption, chloroaniline, aqueous solubility, octanol/water partition coefficient (K_{oc}), 519
- Soil and groundwater contamination potential, tiered testing scheme, lysimeter, model calculation, field testing, 421
- Soil biomass, pesticides, acifluorfen, trifluralin, 261
- Soil persistence, pesticides, biodegradation, activated sludge, 279
- Soil properties, controlled release, carbofuran, lignin, 469
- Soil sorption coefficient (K_d), atrazine, trifluralin, soil sorption constant (K_{oc}), 503
- Soil sorption constant (K_{oc}), atrazine, trifluralin, soil sorption coefficient (K_d), 503
- Soil thin layer chromatography (TLC), fungicide, triazole, mobility in soil, successive leaching, 459
- Soil-plant system, terbutylazine, maize, volatilization, biomineralization, lysimeters, 377
- Soil-water system, dichloroprop, mobility, octanol/water partitioning coefficient, 399
- Soils, pesticide, adsorption, chlorpyrifos, 541
- Soils, quinmerac, synthetic iron oxides, natural iron oxides, organic carbon content, crystallinity, 121
- Sorption, soil, chloroaniline, aqueous solubility, octanol/water partition coefficient (K_{oc}), 519
- Successive leaching, fungicide, triazole, soil thin layer chromatography (TLC), mobility in soil, 459
- Synthetic iron oxides, quinmerac, natural iron oxides, soils, organic carbon content, crystallinity, 121
- Temperature, mathematical description, transformation in soil, 1,3-dichloropropene, microbiological interspecific competition, population size and growth, 591
- Terbutylazine, soil-plant system, maize,

- volatilization, biomineralization, lysimeters, 377
- Testing, environmental exposure, hazard assessment, abiotic degradation, 145
- Tiered testing scheme, soil and groundwater contamination potential, lysimeter, model calculation, field testing, 421
- Time, soil, adsorption, desorption, pesticides, availability, 333
- Titanium dioxide, photocatalysis, atrazine, herbicide photodegradation, 161
- Transformation in soil, mathematical description, 1,3-dichloropropene, temperature, microbiological interspersive competition, population size and growth, 591
- Triazole, fungicide, soil thin layer chromatography (TLC), mobility in soil, successive leaching, 459
- Trifluralin, atrazine, soil sorption coefficient (K_d), soil sorption constant (K_{oc}), 503
- Trifluralin, pesticides, acifluorfen, soil biomass, 261
- Vicia faba*, atrazine, glyphosate, soil, micronuclei, 233
- Volatility, atrazine, soil, chamber, direct measurement, 391
- Volatilization, terbutylazine, soil-plant system, maize, biomineralization, lysimeters, 377
- Water, molinate, decontamination, processes, biodegradation, 219
- Water, residues, imazapur, HPLC, soil, pesticides, 39
